

Value Education - 10/10/23

Today we learnt about chapter 6 of prescribed VE Book. It was about Harmony in Self. Where several points are discussed by about Human aspiration i.e. Happiness and Prosperity, Activities of Self.

It explains about Desire, Thought, Expectation, where ~~to~~ all three are part of Imagination, but have their own subparts like Analysing Computing & Select testing.

After learning about basic desires, we got a task to mention several common proposals which we genuinely face, one by each student of the group.

Several proposals were raised like Sleep v/s academics or saving v/s spending or sports v/s esports. As mentioned, we could have answered most of the questions with rationality and prioritize them but then too we usually face such dilemma.

Most of the answers can be related to Time-management, which we lack and also lack of being responsible about our decisions, which can impact later.
