

Summary of Value Education

14/08/23

In Value Education class of 14/08, We read the first chapter of prescribed book.

We learnt that fulfilling Haps life needs very less amount of things. Our body required Food, clothes and shelter only, but our mind requires safety, Society, family, prosperity etc.

To satisfy our brains, we need to satisfy several layers which includes Self, family, Society And Nature.

For Self we need to be physically & mentally fit. For family we need to invest time, share worries and Happiness. Though Society doesn't easily change by individual effort, but Individual efforts can change Society. Nature it does change with long term effect.

Then, we have learnt about value & Skill education, where both were termed complimentary and highly important. The value of entity is in larger order of which it is a part. & Value Education helps us to find higher order. It tells what to do, where Skill education focuses on how to do.
